Summary

Electronics and Communication Engineering graduate with hands-on experience in Manual Testing, API Testing, Automation Testing, and defect tracking. Skilled in functional and regression testing with knowledge of STLC and Agile methodology. Proficient in Mobile Automation, Playwright, Postman, and Jira, with programming skills in Python and SQL. Strong analytical and problem-solving abilities focused on delivering high-quality software through effective testing and continuous learning.

Technical Skills

Programming: Python, Java script, SQL, HTML, CSS

Testing Skills: Manual Testing, Automation Testing, API Testing, Mobile Automation, Functional Testing, Regression Testing, Smoke Testing, End to End Testing, Web Automation Testing, Defect Lifecycle Management, Agile Methodologies, SDLC, STLC

Testing Tools: Postman, Playwright (Python), Android Studio, Appium Inspector, Jira, Azure DevOps, pgAdmin

Generative AI: Prompt Engineering, AI Content Generation

Tools and Technologies: Linux, MS Office, Git, GitHub, Visual Studio

Experience

Nextenti Tech Pvt. Ltd.

Software Testing

Hyderabad, India

April 2026 – Present

- Developed and executed mobile automation test scripts using Appium with the **WebdriverIO(Java script)** framework for Android applications, leveraging Android Studio for emulator management and **Appium Inspector** to identify and validate UI element locators.
- Developed and executed web automation test scripts automated using **Playwright with Playwright Test framework**, enhancing test coverage and reducing manual regression effort through reusable and scalable automation frameworks.
- Designed and executed test cases for mobile and web applications covering **Functional, Regression, Smoke, and End to End** scenarios to validate application functionality, reliability, and performance.
- Conducted **REST API testing using Postman**, validating requests, responses, authentication mechanisms, HTTP status codes, and request and response data against business requirements.
- Worked with Jenkins and GitLab CI to configure CI/CD pipelines for automated test execution, test reporting, and continuous validation across application builds.
- Identified, documented, tracked, and verified defects using **Jira and Azure DevOps** throughout the defect lifecycle, ensuring timely resolution and software stability.
- Performed database validation using **SQL and pgAdmin** to verify backend data integrity and support comprehensive end to end testing.
- Analyzed test results, prepared test reports, and provided feedback on application stability and usability to support high quality software releases.
- Collaborated with developers, product owners, and QA team members in an **Agile and Scrum** environment; participated in sprint planning, daily stand ups, sprint reviews, and retrospectives.

Amazon Web Services (AWS), AICTE

AI/ML Intern

Remote

April 2025 – June 2025

- Built end to end ML pipelines using Python and AWS SageMaker.
- Developed and deployed ML models using Python libraries and AWS services including EC2, S3, and IAM.
- Trained and validated classification and regression models on real world datasets.
- Gained hands on experience in cloud based ML deployment and scalability.

Education

Gayatri Vidya Parishad College of Engineering

B.Tech, Electronics and Communication Engineering, CGPA: 7.52

Andhra Pradesh, India

2022 – 2026

Projects

AI-Powered Patient Monitoring System

STM32, ESP32, Raspberry Pi, FastAPI, SQL, AWS

- Designed a distributed healthcare system for real time monitoring of vital signs (HR, SpO2, Temperature) via secure MQTT using STM32, ESP32, Raspberry Pi, and cloud AI.
- Built an Edge ML (Random Forest) model for anomaly detection and integrated LLM based alerts for clinical insights.
- Developed a FastAPI and SQL backend with a live dashboard; scaled the system from 5 to 100 patients with stable performance.

Certifications

- Introduction to Software Testing
- Generative AI: Introduction and Applications, IBM
- Python Programming, AD Infocom Systems
- Python Essentials 1 and 2, Cisco Networking Academy
